

## colour themes autumn/winter 07/08

### RATIO AND PASSION

Fashion is banking on new clarity – it is confined to the essentials. Earthy looks are refreshing in colour and pattern. Excitement is created by contrasts from glossy to matt or smooth to structured. Intricate details provide relief for the season and spice up its appearance with emotion.

### DISTINCTION

Marble sculptures and the shadow plays of Gothic churches are the inspiration for the colour story. Natural blends such as grey, camel, vicunja and quiet brown have luxurious appeal. Silver provides a cool gloss in technical fibres such as nylon as a counterpoint to wool. Precise silhouettes sharpen the contours and accentuate the basic patterns. Shepherd Checks and Scottish Tartans are the favourites.

### LOGIC

Frosty nature and suburban melancholy are reflected in a pallet of icy blues, green and berry shades. Winter white and taupe highlight natural wool shades. Fleecy fabrics provide comfort and jerseys are uncomplicated. Dark tartans, denim and leather are hallmarks of the contemporary look – small checks define prints and coloured fabrics.

### LEGEND

Rich green and brown shades reflect myths of legendary forests. Furs, feathers and animal prints enrich wool and cotton and the metallic content allows them to radiate a completely new light. Cool blue adds contrast and harmony inspired by the rich heritage of British patterns. Casual looks are viewed with an urban and neat touch.

### TRANSGRESSION

Black is back! Elegant and mysterious, it characterizes extra-slim, stretched silhouettes. Deep dark shades like midnight blue, aubergine and violet extend the palette of dramatic looks. Deep red and copper reflect passion - satin and velvets are for dressing up. Black leather, denim and nylon display a progressive look. The touch of gold does not shy away from glamour or baroque exuberance.
